left London for Spain. Austria .- From Austria we learn that the Emperor meditates a visit to Prague, with a view of attaching to his person the Bohemian provinces. The French, English, Swedish, and Belgian ambassadors have reached Innspruck, and it is supposed that the affairs of lialy will there be discussed. The hopes of the people of Austria seem centred in the Archluke John, who, as the counsellor of the Emperor, will be the medium of communication between him and his subjects.

Prussia.-In Prussia affairs have come to a dead lock. In the Berlin Parliament, a declaratory vote, of an abstract nature, whether the events of the 18th and 19th of March had tions:dethroned the King, and originated a new constitutional system, being nagatived by a small majority of 19, the people of Berlin have again been thrown into a state of sumult which appears like to have been serious consemences. The democrats of that capital are at act issue with the court party; & unless the dimob can be brought to some reason, an appeal fortable and happy. will certainly be made to the army, and a aghtful civil war will be the result.

Germany.-The Diet of Frankfort seems to be occupied with the adjustment of Sclavonian affairs, and the formation of a Directory to manage the affairs of Germany, until the defective establishment of a supreme cenmal government in Germany, when its soverearn functions will cease.

Money Market - Money continues abundant. First class bills now discounted at 3 per cent. The Bank of England has reduced anie from 4 to 31 per cent. From all parts Great Britain the accounts in relation to the gowing crops, are cheering in the highest deree. The weather continued of the most faorable character, forcing them forward with great rapidity and luxuriance.
